

SENIOR ACTUARIAL ANALYST

Aon Retirement Solution line helps clients mitigate retirement plan risks with timely, accurate and cost effective actuarial services. These include carrying out accounting valuations for clients on a yearly basis in our expert team. Over the last decade we have grown into a knowledge center within Aon with a team of 70 people and we provide support to many European countries.

What would you do:

- Performing data tests and implementing occupational pension plans in our valuation software
- Analysis and explanation of the valuation results to internal and external actuaries from all around Europe and reporting them according to national and international accounting standards (e.g. IFRS, ASC 715)
- Working in and managing international projects and building relationships with Aon offices abroad
- Continuously improving best practice, processes and internal calculation models
- Active participation in knowledge sharing, training and mentoring junior team members

Why come to Aon:

- Professional and valuable experience at a global market leader consultancy with a prospect of becoming a project manager or market leader
- Expertise in pension legislation, accounting, and actuarial calculations
- Internal career opportunities and positions in other Aon offices
- Young, supportive and dynamic team
- Competitive compensation package (e.g. performance bonus, cafeteria)
- Flexible working hours/opportunity to work from home
- On the job training, peer learning (mentoring)
- Foosball table, Nintendo Switch, free coffee, fruit day, office massage etc.
- Corporate wellbeing programs

Apply if:

- Degree in Economics, Finance, Mathematics, Natural Sciences or any other relevant field
- 2-5 years of experience in an insurance company or in an actuarial consulting firm
- Confidence in English is a must, German is an advantage
- Good mathematical skills, analytical mindset
- Accuracy and excellent computer literacy (Excel is a must, VBA is an advantage)
